Himmelfarb Li 

From the Director's Desk

Over the last few weeks, the staff of the Himmelfarb Health Sciences Library has been in the process of analyzing journal usage and reviewing subscription increases for the year 2000. While journal title additions and deletions are handled annually, the review process is particularly important this year due to a \$45,000 reduction in the journal budget. New journal titles are added on the basis of faculty requests, new programs, and interlibrary loan usage.

When a new title is added to the collection, a title of commensurate value is generally deleted. Titles are consid-

Future Journal Cancellations

The following is the text of an e-mail that was sent to faculty.

Dear faculty member:

Over the last few weeks, the staff of the Himmelfarb Health Sciences Library has been in the process of analyzing journal usage and reviewing subscription increases for the year 2000. While journal title additions and deletions are handled annually, the review process is particularly important this year due to a \$45,000 reduction in the journal budget. Even when the budget allocation remains constant, titles must be dropped because of journal cost increases. Titles are considered for deletion based on current and past usage, cost, and faculty input.

Titles held at Gelman Library are also being considered for deletion. Using the process outlined, the titles listed below have been identified as candidates for deletion.

ered for deletion based on current and past usage as well as cost. As always, your input will be solicited. Any titles chosen for deletion will be circulated to faculty for your feedback via Medical Center listservs and campus mail. Please feel free to contact me at 202-994-1826 or mlbaml@gwumc.edu with your comments and concerns.

The Himmelfarb Health Sciences Library remains committed to maintaining a strong collection. We want to work with faculty to fine tune our holdings to our patrons' needs and to expand into the electronic arena.

The purpose of this letter is to solicit faculty feedback before any final deletions are made. Please review the list below and provide your comments by noon on October 22, 1999 to either Beth Layton (202-994-9756 or mlbbal@gwumc.edu) or Anne Linton (202-994-1826 or mlbaml@gwumc.edu).

The Himmelfarb Health Sciences Library remains committed to maintaining a strong collection. We want to work with faculty to fine-tune our holdings to our patrons' needs and to expand into the electronic arena. We look forward to hearing from you.

Sincerely,

Beth Layton, Deputy Director
Anne Linton, Director

Ovid Order Available On and Off Campus

Effective August 23, 1999, Ovid Order was activated at Himmelfarb Health Sciences Library. This new document delivery service allows electronic ordering of articles while searching Ovid databases.

The process is simple. While searching your selected database, check the articles that you wish to purchase. Click the "Order" button, located in the Citation Manager. Then complete the electronic form and read and accept the Copyright statement. These electronic requests are considered HPS orders or an Interlibrary Loan. Please note that the pricing structure is based on your affiliation with the GWU Medical Center.

In order to gain access to the Ovid databases from off-campus you must use the WRLC Aladin interface to proxy in to the campus and then select your database of choice from the alphabetical list. There are two steps to this process. Number 1, set up the WRLC proxy server on your home browser. Number 2, use your Social Security Number as your password to the system. Instructions for setting up off-campus access

are available on the Gelman Library Home Page at <http://www.gwu.edu/~gelman/>.

If you need assistance or have additional questions, please contact the ILL/ Document Delivery Office at (202)994-2860 or the Reference Desk at (202)994-2850.

This Ovid Order feature is available in the following Ovid databases:

Himmelfarb Library Responds to Your Comments

Himmelfarb Library staff would like to thank all those who responded to the survey last spring. We take your comments, suggestions and questions very seriously and hope that the survey will be a first step in an ongoing dialog. We need to hear from you about the electronic resources necessary for your study, research, and patient care needs. Over the next few Information Interface newsletters we will highlight our responses to your comments. The full survey report is available through our Web Page at <http://www.gwumc.edu/library/survey/99report.htm>. You can reach us by calling the Reference Desk at 202-994-2850 or by e-mail at library@gwumc.edu.

How can the Himmelfarb Library adjust resources to better serve the School of Public Health and Health Services?

The Library has taken several steps to recognize and incorporate the needs of the School of Public Health & Health Services into its planning and collections development. The HSMP journals were moved from Gelman to the Himmelfarb Library in the spring of 1999. The staff has spent time reviewing the scope of our Collection Development policy to include health science administration, health policy, and international health issues.

As of July 1, 1999 we have added the **American Journal of Public Health** to our electronic journal collection. Licenses for other electronic products have been reviewed to ensure adequate access for all students. Textbooks used by both programs have been reviewed and duplicates purchased where needed. The Library is also in the process of add-

ing new resources to strengthen the collections for SPHHS, as well as specific programs such as Physical Therapy and Exercise Science. The staff welcomes your suggestions for other texts and any assistance you can provide in identifying resources that are heavily used.

Will the Library provide more resources to support the following areas: international and environmental health programs, psychiatry/psychology research, alternative medicine, and drug information?

The Library has provided links from its Home Page to statistical data, environmental health information, and alternative and complementary medicine information. Himmelfarb also provides access to a number of electronic drug resources in compact disk format, including Mosby's GenRx, USP DI Drug Information for the Health Care Professional, USP DI Advice for the Patient, and The Medical Letter on Drugs and Therapeutics. The DSM IV text is available on compact disk. Also, the Library provides online access to an Alternative Medicine database, a series of Occupational Health and Safety databases, the PsycINFO database and Rehabilitation Medicine databases. All resources are available in the Library and from the Medical Center Network.

In addition, we share electronic resources with the Gelman Library. Under the heading "Article and Other Databases" on the Gelman Library Homepage is a list of all the databases, journals, and other resources accessible to the entire GWU community, including a number of business, statistical, and scientific resources.

We take your comments, suggestions and questions very seriously and hope that the survey will be a first step in an ongoing dialog.

I Need That, What Do You Call It, Thing That Lets Me Show My Power Point/Computer Presentation...

That thing is called an LCD Projector and if you are planning a computer presentation in your classroom, Display Services provides LCD projectors as well as laptop PC's to faculty, staff and students in the School of Medicine and Health Sciences and the School of Public Health and Health Services. You will need to reserve the equipment, at least 24 hours in advance, by calling the (BAVSC) Bloedorn Audio Visual Study Center at 202-994-2856. A technician is available Monday through Friday, 7:30am through 8:00pm to set up computer equipment in Ross Hall. You may also check out the equipment from the BAVSC when a

technician is not available. If you need instruction on the use of the equipment, please make arrangements with the AV staff prior to your presentation. If you are planning to use your own software on our laptop PC, you may wish to check with the Microcomputer Librarian at 202-994-1825 for compatibility specifications. Note: anything you install must be deleted following your presentation. Network connections are also available in most of the classrooms. For more information and/or instructions, please contact the Bloedorn AV Study Center at 202-994-2856.

You will need to reserve the equipment, at least 24 hours in advance, by calling the (BAVSC) Bloedorn Audio Visual Study Center.

Spotlight On New Staff

Outreach Services is pleased to welcome Laura Abate to the Reference Staff. Laura comes to Himmelfarb Library from the National Cancer Institute PDQ/CANCERLIT Service Center in Bethesda, Maryland. She earned her Masters in Library Science at the University of North Carolina, Chapel Hill and worked in the Medical Ethics Program at the University of California, San Francisco. In her position as Reference Librarian, Laura will be serving on the Information Desk and teaching a variety of classes. The staff is happy to have Laura with us.

Himmelfarb Library welcomes Deidre M. Washington as the ILL/Document Delivery Specialist. Deidre comes to us from Durham, North Carolina. She earned the Bachelor of Science degree in Biology/Chemistry from Howard University in 1997. She is currently in the MPH program at The George Washington University.

Questions regarding Offsite Services, Loansome Doc, Interlibrary Loan and Himmelfarb Photocopy Service(HPS) can be directed to Deidre at (202)994-2860 or via e-mail at mlbdmw@gwumc.edu.

The George Washington University Fades Out Modem Pool

The current ISN connectivity and modem pool at GW is being removed due to obsolete low speed 14.4kb equipment. The current status is that about 50% of the original equipment have been removed from service as of October 1, 1999. Therefore, as of January 2000, The George Washington University will no longer be providing a modem pool for users to dial into for access to GW systems. To connect to GW computing systems (and the Internet as a whole), users will need to supply their own method of Internet access.

speed Internet access. DSL is currently available in Washington, DC and many suburbs. ISS has recently negotiated a discounted rate for DSL service with a vendor call Flashcom for the GW community. A monthly charge of \$41.95 per month with a two-year contract enables you to get free installation, a free modem, and a free first month of service. To sign up for this service simply call Flashcom's toll free number (1-877-8664-8375), and press one (1) to Speak to a customer service representative.

New technologies are constantly increasing the number of methods to get high-

Frequently Asked Questions

Question: Does the AV Staff deliver equipment to Ross Hall, or do I pick it up at the AV Study Center?

Answer: AV technicians are available to deliver equipment to Ross Hall classrooms weekdays, between 7:30am and 8:00pm. Equipment being used outside of Ross Hall classrooms, or outside of listed hours can be picked up directly from the Bloedorn AV Study Center, 3rd floor of Himmelfarb Library, and must be returned by 11:30pm to the BAVSC.

Question: Can I copy software to use at home?

Answer: While most of our software is copyright-protected, certain software programs are available for copying. Check with the AV Study Center staff to find out how programs may be copied.

Overdue Notification By E-mail

Starting in October 1999, Himmelfarb Health Sciences Library will send overdue notices via e-mail. E-mail notification provides faster notice of overdue items for you and a reduction in cost and manpower for library staff.

Please ensure that we have your correct e-mail address by submitting your e-mail address at the Circulation Desk of Himmelfarb Library.

Notices can be sent to any e-mail address on or off campus.

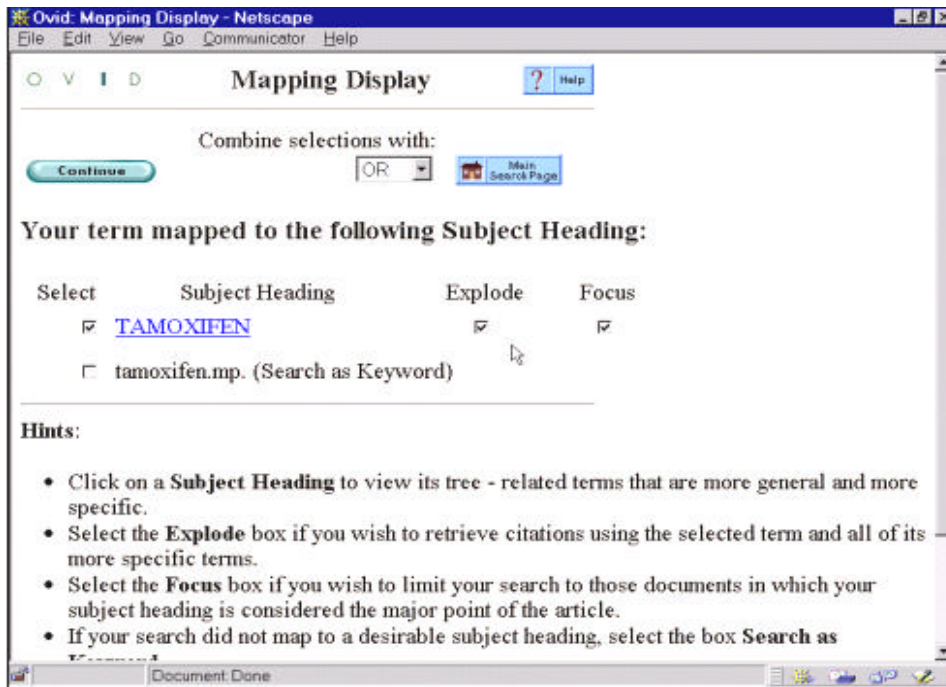

The Savvy Searcher

Limiting Your Search

As we discussed in the last column, the problem in searching in MEDLINE is not finding too little, but rather finding too much. The ideal is to structure your search strategy so that you retrieve exactly the type of article you need.

For example, let's say you are interested in locating recent articles on current clinical trials or studies on the use of tamoxifen in cancer treatment. This will require limiting your MEDLINE search to a particular publication type.

STEP ONE - Search using the subject term **tamoxifen**. Remember that the OVID MEDLINE search system will map you to the correct subject term. Using the **explode and focus** search features will improve your search results.

The Savvy Searcher Continued

STEP TWO - Apply the subheading, **therapeutic use**, in order to retrieve references in which tamoxifen is used to treat cancer. If you selected all subheadings, you would retrieve all references on tamoxifen.

Library Hours

Winter 1999 Holiday Hours

Thurs./Fri., Nov. 25-26 (Thanksgiving Day)	Closed
Thurs.-Sat., Dec. 23-25 (Winter Break)	Closed
Sunday, Dec. 26	10:00 am - 6:00 pm
Mon.-Wed., Dec. 27-29	7:30 am - 6:00 pm
Thurs.-Sat., Dec. 30-Jan. 1	Closed
Sunday, Jan. 2	Regular Hours
Monday, Jan. 17	9:30 am - Midnight
Tuesday, Jan. 19	Regular Hours

The Library is open to GW Medical Center Personnel (Except Holiday Periods)

Monday-Friday	7:30 am-Midnight
Saturday/Sunday	9:00 am-Midnight

The Library is open to University Personnel:

Saturday-Sunday	Medical Center only
Monday-Friday	7:30 am-6:00 pm

The Library is open to the public:

Monday-Friday	7:30 am-2:00 pm
---------------	-----------------

Please be prepared to show ID after 2:00 pm
