Alumni Notes ................15
The first half of the year is gone and we find ourselves "counting up" and "counting down."

The "ups" include getting an interest from alumni that has allowed us to get to new medical students early and to start a program of student friends here in D. C.; talk to and start the formation of regions for alumni associations in the New York-New Jersey area, the Florida-SouthEast area, the New England area, and the California area; represent alumni on the President's Task Force for a GWU Medical Center; represent alumni at national meetings; constitutional revisions; directory supplementation; and the second winter meeting held in Portugal.

The "countdowns" include getting to the other regions to discuss and stimulate for new medical students early and to start a talk to and start the formation of regions there; start off the newest alumni to discuss and stimulate further such meetings. It is sufficient to say the GW alumni and faculty presented the following papers:

- "Thoracic Outlet Syndrome"—Dr. John Keeshihan '50
- "Surgical Approaches"—Dr. Norman Isaacson
- "Fetal Salvage with Intensive Care and Monitor Service"—Dr. Marvin Footer '42
- "Present Role of Oral Medication in Diabetes"—Dr. William Kurstin '43
- "Delayed Gastric Emptying Following Pepsic Ulcer"—Dr. Jerome Cantor '55
- "Myocardial Revascularization"—Dr. Paul Atkins

There was also a discussion of the new Medical Center. Presentation of papers and talks was followed by informal discussions.

No report would be complete without reference to the annual support program. The present status: 300 alumni have contributed and the grand total is now $33,000. It is plain to see that if all of the "not yet contributed" became "contributed" that we could surpass our goal of $100,000. Remember that if you graduated from the medical school, served a residency at GW Hospital or are, or were, a faculty member, you are entitled to be known as a member of the GW Medical Alumni Association and can contribute to the welfare of the school. Lucky!

Marvin P. Footer, President

Annual Winter Meeting was held December 5 to 12, at the Penina Golf Hotel in the Algarve area of Portugal. Problems of transportation were quickly forgotten and the program went according to plan. GW alumni and faculty presented the following papers:

- "Surgical Approaches"—Dr. Norman Isaacson
- "Fetal Salvage with Intensive Care and Monitor Service"—Dr. Marvin Footer '42
- "Present Role of Oral Medication in Diabetes"—Dr. William Kurstin '43
- "Delayed Gastric Emptying Following Pepsic Ulcer"—Dr. Jerome Cantor '55
- "Myocardial Revascularization"—Dr. Paul Atkins

There was also a discussion of the new Medical Center. Presentation of papers and talks was followed by informal discussions.

No report would be complete without reference to the annual support program. The present status: 300 alumni have contributed and the grand total is now $33,000. It is plain to see that if all of the "not yet contributed" became "contributed" that we could surpass our goal of $100,000. Remember that if you graduated from the medical school, served a residency at GW Hospital or are, or were, a faculty member, you are entitled to be known as a member of the GW Medical Alumni Association and can contribute to the welfare of the school. Lucky!

Marvin P. Footer, President

The second winter meeting held in Portugal.
Grants
HEW/PHS/Div. of Research Resources
Dr. John Parks: "General Research Support Grant."

HEW/National Eye Institute
Dr. Mansour F. Amaly: "Collaborative Glaucoma Study."

HEW/NIH/Arthritis and Metabolic Disorders
Dr. Juan C. Penhos: "Insulin Secretion and Intestinal Factors."

HEW/National Institute Child Health and Human Development
Dr. Marilyn J. Koering: "Electron Microscope Studies of Ovarian Steroid Cells."

John A. Hartford Foundation, Inc.
Dr. Donald J. Massaro: "Studies in Adult Respiratory Distress Syndrome."

HEW/PHS/NIH/National Cancer Institute
Drs. T. Crandall Allford and Ariel C. Hollinshead: "Clinical Investigation of Car­
taneous Hypersensitivity Reactions to Antigens on Malignant and Non-Malignant Cells."

Dr. Glenn A. Walker: "B12 Analogues as Chemotherapeutic Agents."

Washington Heart Association
Dr. Marie M. Cassidy: "Role of Carbonic Anhydrase in Sodium and Fluid Transport by the Small Intestine."

Dr. Kenneth J. Dickie: "Effect of Pulmonary Perfusion Pressure on Synthesis and Secretion of Lung Surfactant Protein."

Dr. Gloria D. Massaro: "Effect of Pulmonary Artery Ligation on Lung Ultrastructure with Particular Reference to the Lungs' Secretory Activity."

ANESTHESIOLOGISTS NAME ALPERT TO HIGH POSTS
Dr. Seymour Alpert, GW's Vice President for Development and Professor of Anesthesiology, has been re-elected to a three-year term on the Board of Trustees and to the vice presidency of the Wood Library-Museum of the American Society of Anesthesiologists.

The Wood Library-Museum is a scientific arm of the ASA that collects and preserves historical instruments, maintains and catalogs manuscripts and monographs, reproduces classical articles, and is accumulating a media library of film and tape, all in the specialty of anesthesia use and teaching. Another mission of the Wood Library is the assembly and distribution of the anesthesiology bibliography compiled by the National Library of Medicine from 2,300 journals.

D. C. MEDICAL SOCIETY TO MEET AT GREENBRIER
The 1972 Scientific Assembly of the D. C. Medical Society will be held at the Greenbrier Hotel, White Sulphur Springs, W. Va., October 27-29. A top notch roster of nationally known speakers will discuss: Sex, V.D. and Abortion; The Human Environment and Pollution; Heroin, Marijuana, LSD and Alcohol; Coronary Artery Disease; New Drugs, Medical Controversies; Surgical Controversies; and Nutrition. Plan now to attend!

GRAND FINALE FOR HALL A
Here is the program for May 26 and 27, with two mornings of "Reports from the Professors," that will include scientific and departmental reports.

Included are golf on Friday afternoon, Council meeting Saturday afternoon, and the grand finish Saturday evening with Class Reunions and Dinner Dance. We will have the last function at the old school by holding the meetings in Hall A, supervised by Bowie. Begin planning now. Let's see how big we can make it.

MEDICAL ALUMNI MEETING—MAY 26 AND 27
Reports from the Professors

Friday, May 26
8:00 a.m. REGISTRATION—HALL A
8:45 a.m. WELCOME Dean John Parks
9:00 a.m. Department of Pharmacology George Mandel, Ph.D.
9:30 a.m. Department of Obstetrics and Gynecology Cecil Jacobson, M.D.
10:00 a.m. Department of Dermatology Robert Higdon, M.D.
10:30 a.m. COFFEE BREAK
10:45 a.m. Department of Pediatrics Andrew Margileth, M.D.
11:00 a.m. Department of Pathology Thomas M. Perry, M.D.
11:40 a.m. The GWU Medical Center James J. Feffer, M.D.

1:00 p.m. GOLF—Washingtonian Golf Club

Saturday, May 27—HALL A
8:30 a.m. Department of Medicine Wallace Jensen, M.D.
9:30 a.m. Department of Surgery Paul Adkins, M.D.
10:30 a.m. COFFEE BREAK
10:45 a.m. Department of Child Health and Development
Robert Parrott, M.D.
Andrew Margileth, M.D.
11:30 a.m. Department of Physiology Richard Kenney, Ph.D.
12:15 p.m. Discussion
1:00 p.m. Council Meeting
GW Medical Alumni Analyses

Dr. Thomas M. Peery, GW's distinguished Professor and Chairman of the Department of Pathology, has plowed through a voluminous AMA publication, "Medical School Alumni—1967," and gleaned interesting statistics on medical graduates. Drawing on data from all the nation's schools, he concentrates on five—George Washington, Georgetown, Medical College of Virginia, University of Pennsylvania and Harvard. Dr. Peery compares activities, geographical distribution, and trends among living graduates on December 31, 1967. According to the study, GW had 3,159 living graduates on December 31, 1967. They state their preference of specialties along the following lines:

1. general practice—623, or 19.7%.
2. internal medicine and medical specialties—516, or 16.3%.
3. obstetrics and gynecology—109, or 3.5%.
4. psychiatry—109, or 6.2%.
5. anesthesia—85, or 2.7%.

GW alumni are in the median position regarding the number of their graduates doing general practice. A state school, the Medical College of Virginia lists 29.1% gp's, Georgetown lists 22%, GW 19.7%, University of Pennsylvania 16.1% and Harvard 6.5%.

GW notes the highest proportion of Ob-Gyn practitioners (anyone guess why?): its 8.5% leads Georgetown's 7.5%, Penn's 6.6%, MCV's 6.2% and Harvard's 3.5%. Conversely, GW shows the lowest proportion of pediatricians, but the spread is not great from Georgetown's 6.7% to GW's 4.6%.

Harvard's high percentage of surgeons is noteworthy, 25.3%, followed by Georgetown's 17.3%, Pennsylvania's 16.6%, GW's 16.3% and MCV's 14.6%.

For most of the other specialties, GW is in a more or less median position. Among the smaller specialties, GW outranks all in radiology preference and shows the least interest in ophthalmology.

Zerosing on GW medical alumni trends in specialty practice, Dr. Peery finds the trend away from general practice clearly evident, occurring largely since 1950. However, it is likely that most of the members of the "unspecified" group in the 1915-29 column were in general practice. If the "unspecified" group in each column is added to the general practice group, the trend toward specialization is even more striking and can be seen to have occurred earlier. Also, the specialties seem to have shared quite evenly in the influx of GW alumni from general practice.

Professional Activities

What are medical graduates doing in practice, teaching, administration, or research? It is no surprise to find that Harvard grad dominates the teaching and research fields of the five schools by a wide margin: Harvard alumni on faculties number 11.9%, followed by Penn's 5.8%, GW's 2.8%, Georgetown and MCV's 2.7% each. Research accounts for 5.6% of Harvard alumni, again followed by Penn's 2.5%, and then GW's and GT's 1.2%, with MCV's 1% trailing.

In administration, however, there is less spread among the schools, with GW's 2.5% second to Harvard's 2.6%, with Georgetown, Penn and MCV following in that order to a low of 1.4%.

GW leads the field in hospital based practice, 14.4%, followed by GT's 13.9%, then Harvard, MCV and Penn, while according to these 1967 statistics, GW alumni rank 4th in group practice and third in other private practice. (Interns, residents and fellows are excluded from these calculations.) Dr. Peery feels that GW alumni rank in the middle position among the five schools with regard to most professional activities, while Harvard's outstanding role in medical education and research is clearly evident.

* Note that this does not mean certification by the Specialty Boards.
** Of this number, 76 were graduated 1900-47 and therefore had not completed specialty training.

Distribution

All 50 states show GW medical alumni. (22 other schools have graduates in every state.) Far away places seem to attract GW graduates most, as it leads the five schools in practitioners based in the mountain and southwest states and overseas, ranks 2d in Pacific northwest practitioners, and scores in the median in northeast and central state areas.
Personal profiles

According to the tables GW has the highest percentage of women graduates, but drops back to median in percentage of board certified specialists, and 4th in three other categories: practitioners in metropolitan communities, practitioners in the same state where they attended school, and practitioners in neighboring states to their alma maters. All of the alumni studied tend to locate in the high density sectors of the Middle Atlantic states, where the schools are. D. C. has the most GW medical alumni—464, followed by California—424, Maryland—320, New York—304, and Maryland-320, New York-304, and science same state where they attended clinical alumni are concentrated in drop to median in percentage of GW’s proportion of federally employed alumni are recently organized schools, and it can be presumed that their standing is largely related to many recent graduates in military service. Among the long established schools, GW’s proportion of federally employed physicians is unusually high. Specialty trends and preferences

Focusing on GW graduates, grouped according to graduation date (1915-29, 1930-49, 1950-67), Dr. Axelrod presented the Paul K. Smith Memorial Lecture in Pharmacology in Hall A. The Nobel Laureate spoke on "Drugs as Tools in Biomedical Research." Dr. Axelrod reminisced on 25 years of laboratory work and his studies at GW, where he said "he had to work very hard for an A+" and recalled giving the wrong answer to a question based on some of his own studies on body water. Delivering his lecture with characteristic enthusiasm and humor, the distinguished scientist reiterated his correlation of scientific discovery and the practice of medicine. Saying he went into research by pure chance, he found one question led to another more complicated question, to some answers, to new searches into enzyme action, and to the chemistry of foreign compounds in the body. During his work, Dr. Axelrod said he "learned a great deal about, first, how to do research, and second, the significance of research to medicine." Understanding what happens to the drugs in the body makes for a safer and more intelligent use of the drug.

The Nobelist puzzled over the species difference in the metabolism of enzymes and realized he had to delve into a sub-cellar and enzymatic approach, with which he "had no experience at all," but with the help of enzymologists, he learned.

DR. KENNEY CHOSEN TO HEAD PHYSIOLOGY

Dr. Richard A. Kenney, Professor of Physiology, has been appointed Chairman of the Department of Physiology. He has been Acting Chairman since 1970. Dr. Kenney came to GW in 1968, as Visiting Professor. His broad experience in medical education includes teaching posts in Australia, Indonesia, Burma and England. He was Chairman of the Department of Physiology, University of Singapore, from 1960 to 1965, and Vice Dean of the Faculty of Medicine there from 1962-65. He has also held teaching and administrative posts with World Health Organization and UNESCO.

A native of Coventry, England, Dr. Kenney holds the B. Sc. degree, with honors, and the Ph.D. degree from the University of Birmingham, England. His research in renal function has been widely published in scientific journals.
ER UNIT NAMED FOR TRUSTEE WISE

NATSON W. WISE
ERGENCY PAVILION

Jeneri medical student Warren Broughton unveils the new name for the hospital's emergency unit at a luncheon with Mrs. Wise, Sister Feffer, and President Elliott, Thursday. Mr. Wise, a former industrialist, has been a University Trustee since 1958. He was named to this post in January, in Washington.

Four GW physicians recently discussed, "The Sickle Cell," on WRC-TV's "Topic," a community affairs program presented weekly in association with the area's six universities. They were: Dr. Wallace N. Jensen, Professor and Chairman, Department of Medicine; Dr. Lawrence S. Leslin, Associate Professor of Medicine; Dr. Sanford L. Leikin, Professor of Child Health and Development; and Dr. Raymon A. Noble, VA Hospital Pulmonary Fellow.

Dr. William S. Yamamoto, Professor and Chairman, Department of Clinical Engineering, has been appointed to the National Advisory Research Resources Council of the National Institutes of Health.

Dr. Henry L. Feffer, Professor of Orthopaedic Surgery, has been elected Chairman of the Advisory Board of MEDICO. He has served five voluntary overseas tours with CARE-MEDICO, including an extensive survey trip to determine the most needed medical programs in British Honduras. He has also served on MEDICO's executive and program committees and headed its Saigon Orthopaedic Project.

Dr. Harold Stevens, Professor of Neurology, was Visiting Professor at the University of Missouri School of Medicine in October. In November he lectured at the National Library of Medicine on Gilles de la Tourette and his syndrome, by Serendipity. His article on this subject was published in the November issue of Journal of Psychiatry.

Dr. Dennis S. O'Leary, Assistant Professor of Psychiatry, was Visiting Professor at the American Society for Surgery of the Hand, in Washington.

On hand for the meeting were GW grads Charles R. Adams, '65, Bruce Butler, Jr., '55, Dr. Adams, and M. Kirk Winters '66.

Dr. Mark N. Ozer, Assistant Professor of Neurology, discussed "Neurodevelopmental Observation," a new diagnostic examination for children with learning problems, at a recent meeting of the Nebraska State Medical Society.

Dr. Alf Lee Fjordbotten, Assistant Clinical Professor of Ophthalmology, has been elected to fellowship in the American College of Surgeons.

New members of the American College of Physicians are: Dr. Allen M. Mondzak '61, Clinical Instructor in Medicine, and Dr. Dennis S. O'Leary, Assistant Professor of Medicine.

Dr. Malcolm S. Artenstein was awarded the 29th Gorgas Medal for his distinguished work in preventive medicine, at the annual meeting of the Association of Military Surgeons, December 7, in Washington.

Dr. John P. Adams, Professor and Chairman, Department of Orthopaedic Surgery, gave the Presidential Address and conducted the 27th Annual Meeting of the American Society for Surgery of the Hand, in January, in Washington.

Dr. Brian Blades, Lewis Salz Professor of Surgery, has been named to the post of Distinguished Physician at the Veterans Administration. He received the Certificate of Appointment in a ceremony at the VA Administrator's Conference, in November, at which time he was cited for the "Integral, vital, and continuing creative influence he has provided the VA for nearly 30 years." He has received two prior Commendations from the Veterans Administration for his outstanding and selfless contributions, one in 1963 and again in 1966.

Dr. Tsung O. Cheng, Associate Professor of Medicine, has been appointed Chief of Cardiology at District of Columbia General Hospital, as of July 1, 1971. It was erroneously reported in the Fall issue of GW Medicine that Dr. Rashid Massumi, Associate Professor of Medicine, had been appointed to this post. The editors regret the error.
Dr. Lewis W. Thompson has been appointed Associate Professor of Surgery and Director of the Division of Plastic Surgery. Dr. Thompson, Assistant Professor of Surgery and Assistant Director of Plastic Surgery at Indiana University Medical Center, also served as Consultant in Surgery to the VA Hospital in Indianapolis. He received his M.D. degree from Bowman Gray School of Medicine in 1966.

STUDENT WM. GRAY WINS ARCS AWARD

William Clark Gray, junior, was the recent recipient of an award from the Metropolitan Washington Chapter of the Achievement Rewards for College Scientists, a national organization dedicated to providing scholarships for deserving students in the sciences. A member of Phi Beta Kappa, Mr. Gray was graduated with honors in 1969 from the University of Maryland, where he was a member of Volunteers in Mental Health.

WINTER CONVOCATION

Four degrees in the medical sciences were conferred at the University's Winter Convocation.

An honorary Doctor of Science degree was awarded to Nobel Laureate Marshall W. Nirenberg, addressed the William Beaumont Society Research Day audience on Friday, February 18, on "Differentiation of Neuroblastoma Cells." Dr. Nirenberg, Chief, Laboratory of Bio-medical Genetics, National Heart Institute, NIH, was awarded the Nobel Prize for Medicine-Physiology in 1968, which he shared with two others for deciphering the genetic code.

His address followed presentation of twelve student research papers chosen from manuscripts submitted for judging by a GW faculty committee. Dr. Harold Stevens, Professor of Neurology, is faculty adviser for the Society, whose president is senior Bruce J. Ammerman.

26 Walter N. Nelson was recently honored by over 400 colleagues and associates at a testimonial in recognition of his more than four decades of practice, as a private physician and as health officer and school physician in Cromwell, Conn.

27 Julius S. Nevisier, Clinical Professor of Orthopaedic Surgery at GW, recently lectured on problems of the shoulder at meetings of the New York College of Medicine and of the Eastern Orthopaedic Association.

33 Earl C. Elkins received the Buena Vista (la.) College Distinguished Service Award, in October. Medical Director of the Mayo Clinic School of Physical Therapy for 14 years, he established one of the first hospital departments in the country to deal with rehabilitation of the paraplegic.

34 Carolyn S. Pincock, First Vice President of the American Medical Women's Association, Inc., participated in the association's 56th annual meeting in December, in New Orleans.

37 Charles S. Coakley, Professor and Chairman, Department of Anesthesiology at GW, was Visiting Professor of Anesthesiology at University of Virginia in November.

45 Bennett Oshlaker, Associate Clinical Professor of Child Health and Development at GW, was interviewed with his family, on NBC's "Today" show, in connection with his book, What Shall We Tell the Kids?, published by Arbor House, October, 1971. As pediatrician, psychiatrist and parent, author Oshlaker offers realistic guidelines in all family problems.

54 Roger M. Morrell recently gave a paper on macrophages proteins at the American Thoracic Society meeting in Los Angeles. He also attended the following meetings: 1st International Immunological Congress in Washington; Gordon Conference on Medicinal Chemistry, in New London, Conn., where he chaired the session on Neuroendocrinology; 8th National Meeting of the Reticuloendothelial Society, of which he was co-chairman, in Detroit.

55 Jonas B. Robitscher, Jr., will become the first occupant of Emory University's newly-established Henry R. Luce Chair in law and the behavioral sciences. Psychiatry...
trist-attorney Robitscher teaches legal psychiatry at Villanova University School of Law, and social and legal psychiatry at the University of Pennsylvania School of Medicine.

'56 Albert L. Sheller has joined the staff of General Medical Associates in Weston, Mass. He is currently Assistant Clinical Professor of Medicine at Harvard Medical School, and an associate in medicine and director of the Allergy Clinic at Peter Bent Brigham Hospital.

'57 Burton S. Epstein, Professor of Anesthesiology at GW, conducted an Emergency Respiratory Workshop in September, sponsored by the American Society of Anesthesiologists, in Philadelphia. At the October meeting of the ASA, in Atlanta, he was appointed Chairman of the Section on Education.

'61 Vincent DeVita, Jr., was one of five nationally known specialists in cancer research on a recent panel discussion of new developments in cancer treatment, for physicians in Northeast Florida. He is acting chief of the medicine branch of the National Cancer Institute.

'64 William M. Hinz has joined the staff of the West Side Clinic, Green Bay, Wisconsin, following military service and a fellowship in pediatric infectious disease at the University of Oklahoma Medical Center.

'67 H. Stephen Fletcher, formerly at D. C. General Hospital, is completing his surgical residency at GW, before entering the Army in July.

'68 Charles J. Bier, currently on active duty in the U.S. Army, has been appointed Chief and Officer-in-Charge of the Emergency Treatment Facilities at William Beaumont General Hospital, El Paso, Texas.

'68 David Denton Davis directs a four-man team of medical specialists who staff the Emergency Room of Tobey Hospital, in Wareham, Mass. They do not have outside medical practice but devote their entire efforts to 24-hour care of ER and inpatient emergencies.
