Director's Desk

Last January, I opened this newsletter with a column discussing open access and its role in scholarly publishing. Since that time, the debate on making research results easily and freely available has continued. This debate has been particularly lively in the United Kingdom where the Research Councils UK issued "a position statement on access to research outputs" strongly supporting open access (<http://www.rcuk.ac.uk/cmsweb/downloads/rcuk/documents/2006statement.pdf>). Closer to home, the debate seems to have left some faculty and researchers confused rather than enlightened on questions of open access and scholarly publishing. Fortunately, there are resources available online to help you sort through some of these issues. The Association for Research Libraries has an excellent information page on scholarly communication at (<http://www.arl.org/sc/models>). For information on GW policies, go to the following resources:

There are a number of organizations outside of the University helping authors to navigate the maze of author rights in the electronic age so that authors can maintain control over their works for classroom use, the creation of derivative works, and posting to a class website. To learn more about these initiatives go to:

SPARC (Scholarly Publishing and Academic Resources Coalition) Author Rights page

Creative Commons (alternatives to traditional publishing copyright licenses)

<http://creativecommons.org>

The Library is always happy to consult on questions of copyright. Please call or e-mail Anne Linton, Director, Library Services, at mlbaml@gwumc.edu or 202-994-1826.

Library patrons will also see changes in the recently refurbished Bloedorn Audiovisual Study Center. We have transitioned to a collaborative technology center [with gift funding from the GW Hospital Women's Board]. Also we have enhanced our traditional audiovisual services with additional electronic content, particularly in the area of physical diagnosis and simulated cases. Other areas of enhancement include improved consultation services in the areas of desktop publishing, presentation software, and poster preparation. Call Alexandra Gomes, Associate Director for Curricular Support and Technology at 202-994-1825 or mlbawg@gwumc.edu for additional information.

Best wishes for a successful year!

Anne Linton, Director, Library Services

Bloedorn Technology Center

With the increasing use of and emphasis on technology and electronic resources within the medical and health sciences fields, the Bloedorn Audiovisual Study Center has also responded to this shift. Over the past few years, additional computers and software programs have been added. There has also been a shift toward web-based materials (when available) instead of video or CD-based options. As a result, the Himmelfarb Library has changed the name of the third floor computer space to the Bloedorn Technology Center. This name better reflects the composition and purpose of the space, and the types of resources available there.

Feeling stuck?... Have Question?

Get help from a Himmelfarb librarian without leaving your computer.

Himmelfarb Library is running a trial that provides IM (Instant Message/Chat) communication with Himmelfarb librarians. Using this service you can chat with a librarian and get answers to your research or library-related questions right from your computer. During the trial, the IM service is available Monday-Friday from 11am until 5pm.

To contact Himmelfarb Library via IM, you can use your own IM account or you can click on 'Ask a Librarian' on Himmelfarb Library's website. The Ask A Librarian webpage ([/ask/](#)) provides a 'MeeboMe' box which will allow you to contact a Himmelfarb librarian using your web window.

If you use your own IM account, Himmelfarb Library's screen-names are:

AIM - himlib
Yahoo - himlib
MSN - himmelfarb@gwu.edu
Google Talk - himmelfarblib

If you are interested, but new to Instant Messaging, please talk with a librarian at our Reference Desk in person, by phone at (202) 994-2850, or by email at himmelfarb@gwu.edu.

Visitor Access Policy

Although Himmelfarb Health Sciences Library exists primarily for the research and education needs of the faculty, students and staff of The George Washington University Medical Center, visitors are welcome to use the library to consult our specific health-related resources between the hours of 7:30AM and 2:00PM, Monday-Friday. Himmelfarb does, however, request that our visitors follow some guidelines as they use our library.

Since we are not a public library, visitors are to restrict their use of the library to specific materials not easily obtained at a public library. Additionally, the library is not to be used for checking email or computer use not related to health care materials. Himmelfarb is also not a study facility for general visitor use. Visitors are strongly encouraged to make use of nearby public library facilities for those purposes. Visitors are requested to leave the library at 2:00PM. After 2:00 PM, all persons entering the library will be asked to show a valid GWorld Card to restrict use to individuals who are faculty or students. Staff members may also use the library before 6:00PM with a valid GW ID.

Library Move to E-Journal Collection

Himmelfarb Health Sciences Library is very pleased to announce that, with the start of subscriptions for 2007, we have completed the 3-year change from a journal collection mainly in print, to one that is largely electronic. The exception to the “electronic-only” nature of Himmelfarb’s journals is the Browsing Collection, housed on the first floor on the 23rd Street side of the library. The Browsing Collection consists of approximately 148 titles designated, due to faculty feed-back and the use of other quality parameters, as titles users continue to want to browse in print. The current year’s issues of these titles are available on the first floor for browsing, and then are bound and moved to the second floor shelving. Approximately 70 other journal titles also remain available in print-only, as the titles do not yet have any electronic component. We will continue to monitor this group of titles, converting them to electronic format as access becomes available. These titles are moved directly to the second floor as they are received, and may be found alphabetically with other bound journals.

A number of advantages to electronic access to journal titles exist for both library users and the library itself. Individuals may consult the journal outside the library’s walls through the library’s homepage. For many who find it difficult to physically go to the library, this increased accessibility can be extremely helpful. It also provides additional access to titles which, while not previously a part of Himmelfarb’s journal collection, may be available in electronic-format-only free through open access and other similar mechanisms. Another advantage is that more than one user can consult a journal at any one time. For the library itself, the space required to keep copies of all back issues, and many management tasks associated with print journals are both reduced. While electronic journals cost as much or even more than print-only titles did, and there are issues when the electronic access goes down for technical reasons, the advantages seem to outweigh the disadvantages.

During February, Himmelfarb Library will be focusing on our “new” largely electronic collection and holding events such as learning lunches to help library users better understand how to take full advantage of electronic journals. Please watch the library’s homepage and in-library publicity to find dates for specific events. The library staff looks forward to sharing our electronic journal knowledge with you and using this journal collection to the fullest.

Running Out of Library Space: Sharing Remote Storage in Increase Cost-savings and Conserve Space

Leah Pellegrino, Head, Catalog and Reserves traveled to Atlanta, Georgia to present a poster on behalf of the library at the Southern Chapter & Mid-Atlantic Chapter Medical Library Association Joint Conference in October. The theme of this year's conference was "Together: New Horizons, New Opportunities." Our poster, Running Out of Library Space: Sharing Remote Storage to Increase Cost-savings and Conserve Space, seemed a good fit for this theme. It was originally presented at the Medical Library Association Annual Meeting in May 2006.

This poster was a joint effort between Himmelfarb Librarians (Kathe Obrig, George Paul and Leah), and librarians from Dahlgren Memorial Library at Georgetown University (Vani K. Murthy and Tracie E. Frederick). It reported on a cooperative project between these two health sciences libraries to relocate pre-1980 bound journal volumes in a local consortium remote-storage facility.

The Himmelfarb Health Sciences Library and the Dahlgren Memorial Library are two academic health sciences libraries located in close geographic proximity. Both libraries have similar collections and were planning offsite projects. Rather than launch separate projects, the libraries worked together to reach an agreement designed to eliminate duplication of identical journal titles in order to conserve space in the storage facility and provide cost savings to both libraries. The volumes of one library were physically shipped to storage, and the second library was then billed their half of the cost for the titles held in common. Both libraries also shipped unique titles held by their institution.

A total of 11,836 volumes were sent to storage from Himmelfarb Library's collection; 6,636 of these were held jointly by both libraries. Both libraries freed up valuable space which was then reconfigured to meet the demands of changing technologies. Less space was utilized at the consortium facility, which was already experiencing space shortages. Both libraries benefited from the significant cost savings as well, and the project proved to be an effective way to promote between the two libraries.

Reserves/E-Reserves Spring 2007

Dear GWUMC Faculty Members & Teaching staff

The Reserves Department at the Himmelfarb Library provides you with services to place Books, book chapters, journal articles, pamphlets, exams and audiovisual material, on Reserves.

» Thinking about placing course reserves materials?

Two types of request forms are available for this purpose:

New Hard Copy/AV Materials Request, for print and audiovisual items;

- New Blackboard Request, for articles to be posted electronically to your course in Blackboard.

These request forms are available at the Reserves Services Webpage.

» Steps for placing Materials on Reserves

The process starts by filling out a request form, then submitting your print or audiovisual materials to at the circulation desk. For Blackboard postings, you can also send the item in pdf format, to the following email account: mlbrsv@gwumc.edu.

Materials are processed on a first come - first served basis. A completed request form must be submitted for all materials.

» Searching Reserves

The library catalog provides a one-point entry to search available reserves, by instructor's name, course name or course number. A printed list of current reserve materials for each course is also available at the library's circulation desk.

News about Reserves

» Electronic Resources for E-Reserves

The Himmelfarb Library subscribes to a broad range of electronic resources (E-Journals, E-Texts & Databases) providing access to electronic materials. These licensed resources can be used for course reserves as long as the use adheres to Fair Use guidelines.

The Reserves Department is available to provide assistance and advice to Faculty members about copyright restrictions in using the library's electronic resources. Our staff can assist you in creating links from the "E-Reserves folder" in your course in Blackboard, to accessible resources offered by the library.

Introducing Himmelfarb News Blog

Check out the new Himmelfarb Library News Blog: </blog/client/>

The blog provides all of Himmelfarb's news and announcements, including:

- > additions and changes to our collection and services
- > highlights and tips for using our resources
- > facility announcements and holiday hours
- > introductions to new staff and faculty
- > library events and courses

The goal is to facilitate communication with the students, faculty, and staff who use the Himmelfarb Library. You are invited to make comments and suggestions and ask questions — we would appreciate all of your feedback.

You can also subscribe to the RSS feed for the blog or to receive blog entries by email.

Please check it out and let us know what you think.

Research Day is Coming! We Can Help.

Did you know that Biomedical Communications within the Office of Marketing and Communications can print your posters right here in Ross Hall? Our Kodak large format poster printer can print up to 60 inches wide so you can display your research for the world to see. You don't even have to leave the building! There are no costly set-up fees or shipping charges. You can have your posters printed within a day or two at very reasonable and competitive prices. You will also receive the personal attention of our staff to make sure that your poster is printed with no mistakes.

In addition, Biomedical Communications offers poster design services, or we can advise you on how to prepare your own posters for printing. With Research Day right around the corner, here are some tips to help you create attractive poster presentations:

- When using PowerPoint to create a poster that is smaller than 36x48, please choose a page set-up size that is 100 percent of your final poster size. If you are creating a poster that is larger than 36x48, choose a page set-up that is 1/2 the size of your final poster and be sure that is it proportional to your final poster size. For example, if you would like a final poster size of 48x96, choose a page set-up of 24x48.
- Choose a standard font such as Times Roman or Arial.
The author's text should be 1/2 the size of the title text.
- The main text should be approximately 2/3 the size of the header text.
- Imported images should be 300dpi.
- It is illegal to download images from web sites without prior written permission.

Use the proper logos. Logos can be obtained for downloading at <http://graphics.gwu.edu/standardset.htm>.

You can find even more information about posters and our other services on our web site at http://www.gwumc.edu/mccm/design_photo/poster.html. We're also available to talk with you personally Monday through Friday from 8 a.m. to 5 p.m. in Ross Hall room 310, by phone at 202-994-2904, or you can email us at photo@gwumc.edu.

Himmelfarb Library Welcomes New Staff

New Reference Librarian -- Elaine Sullo

My name is Elaine Sullo, and I began working as a Reference and Instruction Librarian at Himmelfarb Health Sciences Library on September 1, 2006. I will be involved in teaching Problem Based Learning and will serve as the liaison librarian to the Biochemistry and Molecular Biology and Radiology Departments.

Although I am originally from Connecticut, I came to The George Washington University via Greenville, North Carolina where I worked as a health sciences librarian for over three years, specifically in the areas of nursing and allied health. In addition to health sciences librarianship, I have an interest in adult education, and plan to complete my Masters of Adult Education in May 2007.

I look forward to working with students, staff, and faculty here at Himmelfarb Health Sciences Library. I can be reached by email at mlbejs@gwumc.edu or by phone at 994-2853.

National Library of Medicine Fellow -- O. C. Tom

Oscencio "O.C." Tom comes to Himmelfarb as a second year participant in the National Library of Medicine (NLM) Associate Fellowship Program.

O.C. received his MLS in May 2005 from the University of Arizona. He completed a graduate internship in Collection Services at the Arizona Health Sciences Library, where he worked on projects related to gift collections and interlibrary loan. He also has experience as a library assistant in the University of Arizona's Law Library, including records management, managing loose-leaf serials, circulation, and reference. As an undergraduate student, he worked with the Community Health Representative Organization of the Navajo Nation, where he developed a data entry procedures manual for a patient registry database and trained Community Health Representatives in its use. His undergraduate degree is in Communication.

His interests while at NLM included electronic library services, information technologies and networking functions. At NLM he worked on projects related to automatic text extraction and medical imaging. He also continued to expand his knowledge of information seeking behaviors. O.C. is originally from Arizona and was born and raised on the Navajo Reservation.

We are pleased to welcome O.C. to Himmelfarb. O.C. can be reached by phone at 202-994-3733 or by email at mlboxt@gwumc.edu.

Easy Access to E-Resources from GW Hospital

Himmelfarb Library now offers GW Hospital users direct links to electronic resources including databases, journals, and textbooks. Hospital users no longer need to log into ALADIN, VPN, or EZproxy for access to our collection, but can simply access lists of e-resources available directly from the GW Hospital.

To access these links, to <http://www.gwumc.edu>, click on "hospital" with the other links for our various users groups (students, residents, faculty, etc.) near the top of the Himmelfarb's website just under the images. Or, go directly to </eresources/hospital/index.cfm>. Once you access the hospital e-resources page, you should use the menu on the RIGHT side of the screen to access the hospital resource links.

In addition to many textbooks and journals, resources which permit direct use from the hospital include MEDLINE, FirstConsult, MDConsult, and UpToDate.

Please contact Laura Abate, Electronic Resources and Instructional Librarian, with questions: Laura can be reached at (202) 994-8570 or mlblea@gwumc.edu or by stopping by the Library.

Electronic Journals Promotion Month

For February 2007, Himmelfarb Library is planning a host of outreach efforts to celebrate Himmelfarb Library's transition to electronic journals and to promote e-journals' use and features to our users. Himmelfarb Library's users can learn more about accessing and using e-journals via a lunchtime seminar series, posters, and email messages. Users should also watch the Himmelfarb library homepage for useful e-journal tips, and to participate in a weekly trivia contest.

As always, please contact the Reference Desk at (202) 994-2850 or himmelfarb@gwu.edu with questions about e-journals or to report problems.

If you have questions about E-Journals Promotion Month or would like to schedule an education session on e-journals, please contact Laura Abate, Electronic Resources and Instructional Librarian. Laura can be reached at (202) 994-8570 or mlblea@gwumc.edu or by stopping by the Library.

Volume 35/Issue 1

Health Observance Corner

January

National Birth Defects Prevention Month
March of Dimes Birth Defects Foundation

www.marchofdimes.com

"About 120,000 babies (1 in 33) in the United States are born each year with birth defects."

National Glaucoma Awareness Month
Prevent Blindness America

www.preventblindness.org

"More than 2.2 million Americans age 40 and older have open angle glaucoma."

Cervical Health Awareness Month
National Cervical Cancer Coalition

www.nccc-online.org/awareness.html

"Worldwide, there are at least 350,000 new cases of cervical cancer per year, of which 80 percent occur in developing countries."

February

American Heart Month
American Heart Association

www.americanheart.org

"Cardiovascular diseases, including stroke, are our nation's No. 1 killer."

National Children's Dental Health Month
American Dental Association

www.ada.org/prof/events/featured/ncdhm.asp

"The American Dental Association held the first national observance of Children's Dental Health Day on February 8, 1949."

Prenatal Infection Prevention Month
Group B Strep International

www.groupbstrepinternational.org

"In regions where awareness and prevention efforts have been implemented, infant deaths from GBS have decreased as much as 70%."

Database Digest

Featuring CINAHL & SPORTDiscus

You have a paper to write. You searched Google for information. Your result set had 4,000,000 results. Nothing looked useful. Hmmm. Where will you find something good on the history of woman and physical fitness?

Try the library's eDatabases here are a few examples:

CINAHL

The Cumulative Index to Nursing & Allied Health (CINAHL) database provides authoritative coverage of the literature related to nursing and allied health. In total, more than 1600 journals are regularly indexed. The database also provides access to healthcare books, nursing dissertations, selected conference proceedings, standards of professional practice, educational software and audiovisual materials in nursing.

Your search on women and physical fitness in the CINAHL database leads you to excellent material for your paper. Here are a few examples.

Gillett PA. Caserta MS. White AT. Martinson L. Responses of 49- to 59-year-old sedentary, overweight women to four months of exercise conditioning and/or fitness education. [Journal Article, Research, Tables/Charts] *Activities, Adaptation & Aging*. 1995; 19(4): 13-22. (42 ref)

Fincher SB. Tailored interventions to increase physical activity and cardiorespiratory fitness in younger black females. [Doctoral Dissertation, Research] (University of Arkansas for Medical Sciences) ** 2004; Ph.D. 88 p.

SPORTDiscus

SPORTDiscus is a bibliographic database, international in scope, covering all aspects of sport, fitness, recreation, and related fields. Articles from more than 2,000 sport-related journals, monographs, book analytics, theses, videotapes, audiotapes, book reviews, websites, and CD-ROMs in English, French and 59 other languages are indexed for inclusion.

Your search on woman and physical fitness in the SPORTDiscus database leads you to excellent material for your paper. Here are a few examples:

Rowland, T.W., Green, G.M. Physiological responses to treadmill exercise in females: adult-child differences. (Reactions physiologiques a un exercice sur tapis roulant pratique par des sujets de sexe feminin: differences entre adultes et enfants.) [Article] *Medicine and science in sports and exercise* (Indianapolis) 20(5), Oct 1988, 474-478 Total No. of Pages: 5

How to export/import references to a RefWorks bibliographic database

Users can export references directly to RefWorks from those medical databases that the library subscribes to via the OVID interface including MEDLINE, CINAHL, EBM Reviews (Cochrane Database, ACP Journal Club, DARE), AMED, Global Health, PsycINFO, SPORTDiscus, HAPI, IPA, and ERIC. Scopus users can also export references directly to RefWorks.

The procedure for how to do this is the same across all the OVID databases. After searching a database you would check the boxes next to the references you want to export. Scroll down to the bottom of the screen, under 'Result Format' check the 'Direct Export' button, and under Actions click SAVE.

The screenshot shows a search results page with two articles selected. Article 9 is by Neacsu AM. [Etiopathogenic mechanisms in glaucoma]. [Review] [10 refs] [Romanian] [Journal Article]. Article 10 is by Walker RA, Romanchuk KG. Long-term refractive change after intraocular lens implantation in childhood. [Journal Article] Canadian Journal of Ophthalmology. 41(4):464-9, 2006 Aug. The 'Results Manager' section at the bottom has four columns: Results, Fields, Result Format, and Actions. Under 'Result Format', 'Direct Export' is selected. Under 'Actions', 'SAVE' is selected.

The Export results to RefWorks button will appear, and you should click CONTINUE.

The screenshot shows the 'Export Results' dialog box. It has a title bar with 'OVID' and 'Export Results'. Below the title bar, there are two radio buttons: 'Export results to RefWorks' (selected) and 'Export results to Endnote, Procite, or Reference Manager'. A red 'CONTINUE' button is visible.

If you have your RefWorks account already open, the import will begin automatically. If not, then you will be prompted to the RefWorks login page; after you login, the import will begin.

The screenshot shows the 'RefWorks User Login for George Washington University Medical Center' page. It has a section for 'New to RefWorks?' with a link to 'Sign up for an Individual Account'. Below that are input fields for 'Log-in Name' and 'Password', and a 'Login' button. There are also links for 'Forgot your log-in?' and 'Athens Users'. A section for 'Not your Organization?' has a link to 'Login using your Group Code'.

When the import is complete, click View Last Imported Folder to view the references.

Import from OVID

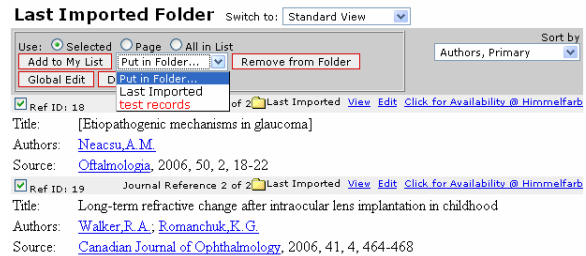

Importing references, please wait...

**

Import completed - 2 references imported

[View Last Imported Folder](#) [View Log](#)

If you have not already done so, create a new folder to save your references in. Check the box next to each reference and under 'Put in Folder' select the name of the folder you created. You must do this because RefWorks overwrites the content of the Last Imported folder each time you import a new set of references.

Last Imported Folder Switch to: Standard View

Use: Selected Page All in List

Sort by: Authors, Primary

Buttons: Add to My List, Put in Folder..., Remove from Folder, Global Edit, Put in Folder...

References:

- Ref ID: 18 test records of 2 Last Imported View Edit Click for Availability @ Himmelfarb
- Ref ID: 19 Journal Reference 2 of 2 Last Imported View Edit Click for Availability @ Himmelfarb

Reference 18 details:
Title: [Etiopathogenic mechanisms in glaucoma]
Authors: Neacsu, A. M.
Source: Ophthalmology, 2006, 50, 2, 18-22

Reference 19 details:
Title: Long-term refractive change after intraocular lens implantation in childhood
Authors: Walker, R. A.; Romanchuk, K. G.
Source: Canadian Journal of Ophthalmology, 2006, 41, 4, 464-468

Users can also import references into RefWorks from text files saved in PubMed or Web of Science. Instructions for how to import references from a saved text file are in the RefWorks Quick Start Guide available online at www.gwumc.edu/library/tutorials/QuickStartGuide.pdf. RefWorks must be able to read the saved text files in order to import your references. For PubMed you must display your results in MEDLINE format. The MEDLINE format will tag the separate element fields in the reference so that RefWorks can interpret the text file. For Web of Science when you are prompted to select a data format for the saved file click 'Continue' as this will default to the Field Tagged format required by RefWorks, do not click the 'Export to Reference Software' button as this does not work. In RefWorks, the default Import Filter/Data Source is set to NLM PubMed. For PubMed use the default setting when importing references from your saved text file. For Web of Science you must change the Import Filter to ISI (Institute for Scientific Information) and select Web of Science in the Database field before importing references from your saved text file.

Users can also import references from the Himmelfarb Library catalog using the 'Search – Online catalog or database' function in RefWorks.

For information about RefWorks training classes run by the library see our continuing education course schedule online at <http://www.gwumc.edu/library/courses/>. If you have any questions about RefWorks please feel free to contact the Reference and Instruction team at the Himmelfarb Library on 202-994-2850, library@gwumc.edu.
