SUMMER cool in the Library

With this issue, Information Interface will take a summer break until September. Some of the work planned for the summer in preparation for the new school year is previewed in this last issue of volume one. The Library Staff wishes all its users a happy productive summer. We extend to the Class of 1977 our warmest congratulations and special best wishes.

ISABELLA YOUNG PORTRAIT DEDICATION MAY 28

In a ceremony planned as a part of the Alumni Weekend on Saturday morning, May 28, 1977, at 9:00 a.m., the Medical Center will accept a studio portrait of Isabella F. Young, for 33 years the director of the Medical School's Library. Refreshments will be served from 8:00 a.m. in the foyer of Ross Hall. Many friends and alumni are expected to be present, especially the Class of 1937, celebrating its 40th anniversary. Dr. Ronald P. Kaufman, Vice-President for Medical Affairs and Ms. Nina W. Matheson, present Director of the Health Sciences Library will accept the gift on behalf of the Library and the Medical Center.

It is hoped that Dr. Walter Bloedorn, Dean of the School of Medicine from 1939-1957 who appointed Miss Young, will be present. Dr. Seymour Alpert, Vice-President for Development, for many years Chairman of the Library Committee, friend and colleague of Miss Young will comment on the role the library played in capitalizing Ross Hall. Dr. James G. Watts, Chairman of the Portrait Committee will be in charge of the arrangements and ceremony. Other members of the Committee who have worked to assure an appropriate remembrance of Miss Young's service and contribution not only to the Medical School but to the education and spirit of the students, faculty and staff are Drs. Frank D. Allan, Seymour Alpert, L. Thompson Bowles, Charles S. Coakley, Ronald P. Kaufman, Sidney A. Levine, Thomas M. Peery, Mary Louise Robbins, Ms. Nina W. Matheson and Mr. Jno Randall.

The portrait, from a photographic study by Harris & Ewing, will hang in the foyer entrance to the library facing the Ross Hall courtyard. The portrait was made possible through the generous contributions of nearly 50 alumni and staff.

Everyone is invited to attend.
ANATOMICAL TEXTBOOKS THRU FIVE CENTURIES

Visitors during alumni weekend can examine an exhibit illustrating the development of printed anatomical textbooks. Included will be reproductions of the 1493 edition of Johannes de Kethum's Fasiculus medicinae and the 1543 edition of De Fabrica Humani Corporis by Andreas Vesalius. Also featured will be works of G.W. Faculty, Drs. Charles M. Goss, Richard S. Snell and Frank D. Allan. The exhibit will be on the first floor of the Library near the elevator.

NEW LOOK (ATMOSPHERE) PLANNED FOR THE FIRST FLOOR

Over the summer months, a major shift will be made in the arrangement of the Library's first floor. With the assistance of an architect, a floor plan has been prepared which relocates the reading and study areas, the photocopy machines and the reference, on-line services and interlibrary loan activities.

The reading and study tables will be shifted to quieter areas away from the photocopy, circulation and reference activity. The photocopy machines will be located closer to the elevator and circulation desk, allowing for better traffic patterns and control. The alcove where the copy machines are now located will become a public services area for reference, on-line services, and interlibrary loan. This shift brings about a logical grouping of these services and makes them more visible and accessible to the public.

As a result of the shift, the first floor should be quieter, the location of the various service areas will be more obvious, and the overall appearance will be open and uncluttered.

MeSH CONVERSION CONTINUING

Work is proceeding on the planned conversion of the subject catalog to MeSH (Medical Subject Headings), the subject terms used by the National Library of Medicine. (If you search in Index Medicus or use our MEDLINE services you are already familiar with many of these terms.)

During August, we expect to set up new guide cards (one for every topic) and place the subject cards behind them. We hope to complete the task and prepare guides explaining the use of the new catalog by the beginning of the fall semester.

PHOTOCOPY NEWS

Sometime during August, an IBM Series III copier will be installed to augment the photocopy services. The Series III will allow users to do automatic two sided copying without having to get someone for the Library staff to adjust the machines. The new copier operates with a sheet fed paper system instead of the roll fed system of the IBM II's. The IBM III will be equipped with a twenty bin collator.

The library is proceeding with the plans announced in the April Interface to install a credit card accounting system on its copy machines. This new feature will tie into the system already in use in the Department of Audiovisual Services. The wiring between the Library's copy machines and the control unit in AV services will be installed over the summer.

This hook-up of the two photocopy services will mean that the large volume discounts currently available from the AV services department will also be available to Library users. This will considerably reduce the need to check out current journals for photocopying. Consequently, these materials will be more accessible for all users.

OVERDUE BOOKS AND FINES

April marked a major step for the Library's new circulation system with the generation of a list of users with overdue books and journals and/or outstanding fines. This list is being used to contact graduating medical students who have not paid fines, or who still have Library materials. As in previous years, these students are being informed that their failure to satisfy their fines or return books and journals will become part of their University record. Accordingly, the student's transcript and future letters of recommendation would reflect that he or she had not met all obligations to the university.
Over the summer months, the circulation system will begin to print updated lists of overdue materials and unpaid fines weekly. Notices will be automatically prepared and mailed to the users.

With the coming full implementation of the automated circulation system, a close look will be taken at the policies and procedures for fines and overdue materials. It is probable that the Himmelfarb Library will adopt policies in conformity with those of the University Library.

STAFF ACTIVITIES

Ms. Nina W. Matheson, Director, was recently elected to a three year term of office as a member of the Board of Directors of the Medical Library Association (MLA). She represented the MLA at a two day conference on copyright held at the Indiana University Graduate Library School, Bloomington, Indiana and at a meeting of the Council of National Library Association's Ad Hoc Committee on copyright implementation. In May, Ms. Matheson will complete her term of office on the Regional Medical Library Program (RML IV) Executive Committee.

Over the summer, staff plan to attend a number of professional meetings. Ms. Matheson and Mr. Jensen, Chief of Public Services, will attend the annual meeting of the MLA in Seattle, Washington. Ms. Matheson will attend the American Library Association in Toronto and Detroit. In addition, she will take part in a seminar on the uses of the Excerpta Medica abstract series.

RECENT MEDLINE TOPICS

The selected MEDLINE topics below can be repeated, modified, or expanded. This list does not include all computer-based bibliographic searches of the past month, but is indicative of the variety of topics successfully run. These literature searches covered 1975 through the present issues of Index Medicus but could have been extended to include from 1966 to the present.

- Computer-Analysis of Electrocardiograms: 38 citations
- Coronary Heart Disease and Exercise: 103 citations
- Diet Therapy of Cancer: 21 citations
- Effectiveness of Psychotherapy: 50 citations
- Hypertension in Adolescence: 87 citations
- Radiation Effects on Sperm: 68 citations
- Radiation Myelopathy: 30 citations
- Role of Pulmonary Surfactants: 37 citations
- Suicide in Adolescence and Pre-Adolescence: 40 citations
We are adopting a simplified list of subject headings for the Acquisitions List. All are in alphabetical order and are based primarily on specialty names—i.e., NEUROLOGY rather than ANATOMY—NERVOUS SYSTEM or DISEASES—NERVOUS SYSTEM. We hope this will make it easier to spot the books of interest to you.
