Part of the Library and Information Science Commons, and the Medicine and Health Sciences Commons
WELCOME TO THE CLASS OF 1981 AND TO NEW AND RETURNING FACULTY AND STAFF

The Himmelfarb Library Staff welcomes all to the beginning of a new academic year. Your work and your use of the library may progress a little more smoothly this fall because we've been busy here at the library this summer - making some changes. For those of you who have never used Himmelfarb Library and for those who have, but would like a fuller understanding of these modifications, the staff has prepared six new brochures describing services and procedures. Stop by and pick them up!

This summer, we placed new staff members in three key positions after a national recruiting effort. We replaced and upgraded the security system on the first floor where alterations were also made in staff work flow and work stations to allow more room for readers. The subject card catalog underwent conversion to National Library of Medicine Medical Subject Headings (MeSH). Faster, more reliable book and journal record keeping systems are nearing normal operating standards; and circulation-system bugs are being steadily identified and exterminated with the help of the Office of Computer Assisted Education and Services.

The new logo for INTERFACE symbolizes the two-way communication essential to productive work. In this issue we present to you our rethinking of some aspects of Library operations and some restructuring which resulted from it. We hope that you will use the Suggestion Book in the Reference area to comment on these changes and on those to come.

In the coming year we will analyze and revise reserve book processing and binding operations and work toward refinement of collection development policies. These approaches to the delivery of library services and collections management are a part of our continued effort to make your work and ours more effective. We are here to help you. Let us know if we can. We look forward to joining you in a busy and productive year.

Nina W. Matheson
Director
NEW STAFF JOIN THE LIBRARY

HELEN KOLBE was appointed Associate Director of the Himmelfarb Library. She assumed the responsibilities of the position on June 1 after serving as an Assistant Research Professor and Project Director for the Population Information Program in the Department of Medical and Public Affairs. Prior to her association with George Washington University, she held library administration positions at ITT Electro-Physics Laboratories; Catholic University; Johns Hopkins University, Applied Physics Laboratory; and the South Dakota School of Mines and Technology.

Mrs. Kolbe is currently President of the Association for Population/Family Planning Libraries and Information Centers, International. She is a member of the Medical Library Association, the American Society for Information Science, Beta Phi Mu, the World Population Society, the Population Association of America, and the American Association for the Advancement of Science. In addition to working with the University and participating in research and professional groups, Mrs. Kolbe acts as a consultant in documentation and information systems.

In the course of developing this multi-faceted career she has written numerous articles and papers, published a thesaurus, and traveled extensively in Europe, Asia, Africa, and South America.

CHERYL A. SLOAN joins the Himmelfarb Library staff on September 19, replacing Joseph Jensen as Chief of Reader Services. She will assume management of the Hospital Reading Room, the Audiovisual Study Center, and Bibliographic Reference and Information Services. In addition to those responsibilities, she will work on development of instructional tools for improved resource use and the organization of a collection development process for the library.

Ms. Sloan worked most recently as Librarian of the Robinson Library at Hartford Hospital; and prior to that as Head of the Reference Department of the University of Nebraska Medical Center Library of Medicine.

She began graduate work in preparation for her library posts in 1968 at the University of Wisconsin. Upon receiving her M.S.L.S. in 1969, Ms. Sloan participated in an NIH/NLM-supported Postgraduate Training Program for Science Librarians at the University of Tennessee Medical Unit. She is active in professional and community affairs and has published two bibliographies on health services.

MARSHALL PFEIFER joined the Himmelfarb Library staff on August 15 as a Library Assistant in Acquisitions. He comes to George Washington University from the Naval Medical Research Institute Library where he worked as a library technician while completing his M.L.S. at the University of Maryland. His program at Maryland focused on medical and scientific librarianship with emphasis in computerized bibliographic information retrieval systems.

Prior to earning his M.L.S., Mr. Pfeifer received a B.S. in Business Administration from the University of Baltimore. He minored there in psychology and has held positions with the Maryland State Department of Health and Mental Hygiene Drug Abuse Administration, HEW, and the University of Maryland Hospital.
FIRST PHASE OF FIRST FLOOR SHIFT COMPLETED

Returning students and staff will find some changes on the first floor of the library. The main entrance has been shifted to the double-door entry off of Ross Hall courtyard. Photocopy machines have been moved to the area which was the former entrance. They are now closer to the Circulation Desk for more effective management and convenience to our users.

The turnstiles have been removed and replaced by a security system which will not require inspection of materials, brief-cases, etc. The Bibliographic Reference and Information desk is now located in the alcove.

Phase Two will bring new shelving and relocation of all reference shelving, and the establishment of office areas in the Bibliographic Reference and Information Alcove. This work will be timed for the least disturbance to on-going study and research work.

NEW LOOK FOR SUBJECT CATALOG

At the beginning of the fall semester, the subject side of the public catalog will contain National Library of Medicine Medical Subject Headings (MeSH), replacing the Library of Congress headings. Gold cards will bear the MeSH headings and the user will find catalog cards relevant to each heading behind the guide card.

MeSH headings correspond to the subject headings which are used for Index Medicus, MEDLINE, and all other subject analyses used by the National Library of Medicine.

A copy of the MeSH catalog, with pertinent headings highlighted in yellow, will be found in the public catalog area. If the subject heading is not highlighted, the user will know that Himmelfarb Library has not used that term. Highlighting will be updated when new headings are added to our catalog.

This conversion of the subject catalog involved refiling 43,000 cards. A year's planning and preparation made it possible for this enormous refiling to take place over a closed weekend. The entire Library Staff participated in the massive effort.

RECENT MEDLINE TOPICS

The selected MEDLINE computer-based bibliography topics below can be repeated, modified, or expanded. This list does not include all computer-based bibliographic searches of the past month, but is indicative of the variety of topics successfully run.

Request forms are available from the Reference Desk.

ADVERSE EFFECTS OF AMNIOCENTESIS 1975-1977
ANTIBIOTICS IN HUMAN MILK 1966-1977
ARTIFICIAL MEMBRANES IN DIALYSIS 1975-1977
CAROTID ENDARTERECTOMY 1975-1977
CEREBRAL THROMBOSIS AND ORAL CONTRACEPTIVES 1975-1977
IMMUNOLOGIC ASPECTS OF INFLAMMATORY BOWEL DISEASE 1975-1977 47 references
THERAPEUTIC RADIATION IN RENAL TRANSPLANTATION 1975-1977 24 references
URETEROCELE 1975-1977
COMPUTERIZED CONTROL OF PERIODICAL HOLDINGS

With the beginning of the Fall '77 semester, control of the library's periodicals collections passed from a manual to a computer system called PHILSOM, an acronym for Periodical Holdings in the Library of Schools of Medicine.

The object of PHILSOM is to combine greater periodicals collection control for the library staff with more specific self-service information for the library patron. The conversion to PHILSOM entails three kinds of changes in the list of periodicals collected by the library:

1) Periodical List Format: PHILSOM uses IBM cards to produce a print-out of the periodicals owned by the Himmelfarb Library and the Hospital Reading Room (GWU Hospital, Room 1722). The print-outs replace the black Linodex listings which was behind the reference desk on the first floor, and its photocopies, which were located near the Index Medicus shelves and on the second floor.

2) Information Provided to Patrons: Each journal title listed in the PHILSOM print-out has more information than the Linodex and its photocopies could accommodate - for example, special notes about accumulating indexes, supplements, bound volumes and other useful information can now be provided. The holdings statement, or what the library owns of any given title, is very specific - showing gaps whenever the collection has gaps, in place of the too general "Vol. 1, 1972-to-date" holdings statement provided in the former manual system.

3) Interpreting Information: The holdings statement in the print-out used in conjunction with the daily cumulating list of new issues received in the library shows the latest volume and issue of every title in the library. Patrons need no longer ask for that information.

The library staff has prepared a brochure which explains in greater detail the self-service features of the new system with an example of a typical periodical title entry as it appears in the periodicals print-out with a guide to interpreting all of the information given about the title. The brochure is available at the Reference Desk, the Information Window and on the second floor. For your convenience, every copy of the print-out will have attached to it the same example and guide to the title that can be found in the PHILSOM brochure, Key to the Periodicals Print-Out.

LECTURE TAPEING SERVICE

All required class lectures for freshman and sophomore medical students and physicians' assistants are audiotaped. The tapes are kept on file in the AV Study Center and duplicated for use by students and faculty. Tapes may be played in the Study Center or borrowed for home use along with a limited number of audiotape playback units. Students or faculty members may also tape elective courses and should contact Shelley Bader at extension 2856 to make those arrangements.

HOSPITAL READING ROOM

Four AV carrels equipped with videotape playback units and color monitors and slide projector/audiotape units are available for use in the Hospital Reading Room (Room 1722). Though media programs are not currently maintained in the Reading Room, users are invited to borrow items which circulate from the AV Study Center or use their own materials.

Computer assisted education programs from the Massachusetts General Hospital, Ohio State University and George Washington University can be accessed through a terminal located in the last AV carrel. Instruction sheets explain log-in and log-off procedures. For first-time users initial instructions on the use of the computer terminal and its programs are also offered in the AV Study Center.
We are adopting a simplified list of subject headings for the Acquisitions List. All are in alphabetical order and are based primarily on specialty names—i.e., NEUROLOGY rather than ANATOMY - NERVOUS SYSTEM or DISEASES - NERVOUS SYSTEM. We hope this will make it easier to spot the books of interest to you.

ALCOHOLISM/DRUG ABUSE

ALCOHOLISM: INTERDISCIPLINARY APPROACHES TO AN ENDURING PROBLEM.
Ed. by Ralph E. Tarter and A. Arthur Sugerman.
HV 5035 .A47 1976

ALCOHOLISM PROBLEMS IN WOMEN AND CHILDREN.
(Seminars in psychiatry)
RC 565 .A448 1976

CHRONIC CANNABIS USE.
Ed. by Rhea L. Dornbush, Alfred M. Freedman, and Max Fink.
(Shelved under Annals of the New York Academy of Sciences; v. 282)

INTERACTIONS OF DRUGS OF ABUSE.
Ed. by Elliot S. Vesell and Monique C. Braude.
(Shelved under Annals of the New York Academy of Sciences; v. 281)

Lemberger, Louis
PHYSIOLOGIC DISPOSITION OF DRUGS OF ABUSE.
