Welcome back! As you finalize your course content for the spring 2019 semester, consider asking a librarian to speak to your students about online sources and research strategies. With advance notice, we're happy to come to your classroom (either in-person or online) and help your students improve their research skills. Below is a list of some of the topics we can offer:

- Introduction to Himmelfarb Library and resources
- Off-campus access to Himmelfarb resources
- Overview of databases
- Building a search strategy
- How to do a research project (building a research question/project)
- What's a literature review?
- Evidence Based Medicine/EBM database instruction
- Plagiarism/Copyright
- Tracking down a full-text article from a citation
- Building a bibliography using RefWorks
- Infographics
- Introduction to systematic reviews

Some topics are better suited to hands-on practice. Depending on the size of your class, we may be able to offer instruction in a computer classroom so students can apply what they're learning immediately. We are also very willing to tailor our instruction to a specific assignment in your course.

Please contact Alexandra Gomes (gomesa@gwu.edu) to arrange for instruction from a Himmelfarb reference librarian.
