OCTOBER

1986

NEW STAFF

Editor's Note: The Library welcomes David Levitt, Datus Proper, Barry Kolodkin, and Faye Green to its staff in this issue of Information Interface. We take this opportunity to introduce them to you and remind you that new and old staff alike continue to work hard at providing you with the information services you need for your patient care, teaching and research duties.

Standing left to right are David Levitt and Datus Proper. Seated toward the front are Barry Kolodkin and Faye Green.

DATUS PROPER

Since 1982, Datus has been a programmer for various projects funded by Iowa State's University College of Veterinary Medicine. He developed numerous programs for scientists including CAI, a database analysis system, and a user-friendly database system. He is familiar with a number of programming languages including Assembler, Fortran and Basic. As the new Technical Systems Programmer/Coordinator, Datus will be instrumental in computerizing the Library's integrated systems. Hobbies include flying airplanes and skydiving.

FAYE GREEN

Faye Green began work on September 2 as Senior Reference Librarian. Faye was most recently employed at Georgetown University Medical Center as Medical Reference Librarian. A native of Mississippi, she earned an M.L.S. from the University of Southern Mississippi. Her leisure activities include working with youth groups, photography and reading.

DAVID LEVITT

David is the Weeknight Supervisor in the Circulation Department. He is a graduate of Vassar College, with a B.A. in geography, and hopes to do graduate work in Environmental Science at G.W. David's interests include backpacking, canoeing, cycling, basketball and swimming.

BARRY KOLODKIN

Barry Kolodkin is the new Interlibrary Loan Technician in the Circulation Department. Originally from New Jersey, Barry has a B.A. in Political Science from Brandeis University. He is currently working toward a Master's Degree in Security Policy Studies at G.W., and enjoys sports, politics and movies.

MEDLINE ANNIVERSARY CELEBRATION

The month of October 1986 marks the fifteenth anniversary of the MEDLINE database. To celebrate that event, the Himmelfarb Library, in cooperation with the National Library of Medicine, will offer all Medical faculty, staff, and students free MEDLINE search services on Monday, October 27, 1986. Simply stop by the Library's Reference Desk between 8:30 am and 5 pm to request a search on that day. This event is one of many planned by the National Library of Medicine during 1986 to commemorate its first 150 years of service to the biomedical community.

ONLINE MANAGEMENT OF PERSONAL FILES

Is your personal collection of articles and reprints getting out of control? Do you wish that it was easier to find articles in your files? Perhaps you should consider using a microcomputer to help you manage your "information explosion".

There are many programs on the market that are specifically designed to handle bibliographic information, ranging in price from \$75 to over \$400. When selecting a program, determine whether a hard disk is needed for the program to perform efficiently and whether the program can adequately manage the size of your finished file. Most programs allow you to output a printed bibliography; will the software you've selected interface with your printer and word processor?

A time-consuming part of computerizing your personal files will be typing in the information about each journal article. You probably want to look for a system that allows easy data entry and editing. A fill-in-the-blank format can be quickly learned, which is important if several people will be using the system. You will want each journal article record to have enough room for multiple authors, keywords and perhaps an abstract. You may also want to look for a system that allows for data entry via down-loading. Programs with this feature not only accept data typed from the keyboard, but from floppy disks onto which the output from an online computer search, such as MEDLINE, has been transferred.

One reason to use a microcomputer-based system is to improve access to your articles. Most systems allow you to search by authors and keywords, but more sophisticated systems also allow you to search your files by words in the title or abstract, date, journal title or truncated terms. You probably want a system that provides for searching on multiple terms using Boolean logic.

Other features to look for include the ability to sort, to print lists of authors or keywords, and to design both input and output formats. You may want to be able to store a number of different bibliographic formats. In order to quickly print a bibliography for a class reading list, a grant proposal or journal article submission, each in a slightly different style. If the software does not offer this feature, make sure that you can at least edit the finished bibliography using your wordprocessing software.

The price of a file management program is not necessarily directly related to its sophistication and capabilities. The Himmelfarb Library has a file of articles at the Reference Desk that review software packages. We also have a collection of demonstration disks.

A workshop, "Online Management of Personal Files", will be offered on November 6, from 1:00-3:30. The workshop will cover what to decide before you computerize and what to look for when selecting software. Hands-on time will be provided for both Apple and IBM systems. You may register for this workshop by calling X2850 and asking for Lynne Apostle.

The Information Interface is published 6 times a year by the Himmelfarb Health Sciences Library, George Washington University Medical Center, 2300 Eye Street N.W., Washington, DC 20037. Editor: Barbara Collins; Assistant Editor: Lynne Bacquillo; Faculty Publications Editor: Anne Linton; Contributions to this issue: Lynne Apostle, Anne Linton.

FACULTY PUBLICATIONS COMPILED

Each issue of Information Interface contains a list of recent publications authored by Medical Center faculty and staff. A list of those books and articles published in 1985 has been cumulated into a single volume entitled "Publications of the Faculty of the George Washington University Medical Center." This volume is available at the Reference Desk of the Library and may be of special interest to individuals preparing grant applications or needing to review Medical Center research interests.

1987 MESH AVAILABLE THROUGH LIBRARY

The 1987 edition of the Medical Subject Headings (MeSH) list is now available for purchase. The MeSH list provides online searchers with subject access to the MEDLINE database. Published in three parts, the list is revised each year by the staff of the National Library of Medicine to reflect changes in medical terminology. All three parts of MeSH are recommended for purchase by searchers. Copies of MeSH may be ordered through the Himmelfarb Library by contacting Anne Linton, Online Coordinator, at X8478. Please place all orders by November 15, 1986. Complete ordering information is listed below.

ORDER NUMBER	PUBLICATION TITLE	PRICE
PB86-227774	Medical Subject Headings, Annotated Alphabetic List, 1987.	\$21.00
PB86-227782	Medical Subject Headings, Tree Structures, 1987	\$16.00
PB86-227790	Permuted MeSH, 1987	\$15.00

LIBRARY HOURS

2nd Year INTEGRATED EXAM SCHEDULE

		LIBRARY	BAVSC
Friday	November 21	7:30am-12 midnight	8:30am-10:00pm
Saturday	November 22	9:00am-12 midnight	10:00am-10:00pm
Sunday	November 23	9:00am-12 midnight	10:00am-10:00pm

THANKSGIVING

Wednesday	November 26	7:30am--8:00am	8:30am--6:00pm
Thursday	November 27CLOSED.....
Friday	November 28CLOSED.....
Saturday	November 29	10:00am--6:00pm	10:00am--6:00pm
Sunday	November 30	10:00am-12 midnight	10:00am-10:00pm
Monday	December 1	RESUME REGULAR HOURS.....

FINAL EXAMS (1st and 2nd Year)

Friday	December 12	7:30am-12 midnight	8:30am-10:00pm
Saturday	December 13	9:00am-12 midnight	10:00am-10:00pm
Sunday	December 14	9:00am-12 midnight	10:00am-10:00pm
