September 2024

To help patrons get the most out of library resources, Himmelfarb staff has created a [Scholarly Communications Video Series](#): designed to both walk users through our software and instruct researchers about all stages of the research life cycle, breaking down concepts into short, actionable tutorials.

This year, we've added a number of useful topics: from curating your ORCID profile, to assessing potential references, to navigating author's rights.

Check out the full list below:

- [Curating Your ORCID Profile](#) - learn what ORCID is, why you'd benefit from having a profile, and how to set yours up.
- [Importing Citations into Refworks](#) - if you're new to using RefWorks, this tutorial demonstrates several methods of importing references from databases and how to organize them - so all your project citations are available to you, including when you create in-text citations and bibliographies.
- [Copyright, Author's Rights, and Publishing Agreements](#) - this video provides an introduction to copyright and copyright exceptions, and introduces useful tools and guides to help you assess a copyright agreement before signing.
- [Cabell's Predatory Reports](#) - this video shows where to access predatory publishing reports on the Himmelfarb website and how to interpret them, helping to ensure your research ends up only in reputable venues.
- [Relevance of Sources](#) - if you're feeling overwhelmed with the amount of available research material, check out these tips on evaluating potential sources.
- [Using QR Codes for Presentations & Posters](#) - learn how to create QR codes and

[Subscribe](#) to our email list.

- [Altmetrics considerations](#) - this video explains traditional metrics and altmetrics, their limitations, where to find them using Himmelfarb resources, and how they can be useful during research and writing.

[The Scholarly Publications Short Video Series](#) contains 41 videos divided into three categories: Project Planning and Development Tutorials, Publishing Tutorials, and Project Promotion and Preservation Tutorials, with many more videos (of varying lengths) on the [Himmelfarb YouTube page](#). These guides will hopefully help you through whatever stage of your current project you're on – or point you to further resources that can. And of course, you can always go straight to the source and [Ask a Librarian](#) by clicking on “Ask Us” on the homepage.

New E-Books

Artificial Intelligence

[Artificial intelligence in drug development : patenting and regulatory aspects](#)

Contraception

[Contraceptive Technology](#)

Gynecologic Nursing
