January 2014

We began the new year with a fresh new look, launching Himmelfarb’s completely revamped website on January 2, 2014. It has been over five years since the Library updated the web site and the new redesign incorporates more new web technologies. This past year we have been working on updating the site, getting feedback from our users on what content they want to access quickly, as well as improving the navigation and organization of resources. Last year you or your colleagues may have participated in one of our many usability testing sessions, focus groups or surveys. Our goal was to organize the resources to how our users access information and include Responsive Design to make the library website more accessible on mobile devices.
