This Newsletter is brought to you for free and open access by the Himmelfarb Health Sciences Library at Health Sciences Research Commons. It has been accepted for inclusion in Himmelfarb Headlines (2009 - present) by an authorized administrator of Health Sciences Research Commons. For more information, please contact hsrc@gwu.edu.
Greetings and best wishes for 2015!

Generally we look both forward and back at the beginning of a new year. For those of you who wish to review recent events and progress at the Himmelfarb Health Sciences Library, the Annual Report 2013-2014 is now available. The 2013-2014 year was very busy for the Library.

The Artist in all of us...Himmelfarb's Art Show

Each year the Himmelfarb Library's first floor is transformed into an art gallery displaying the original works of our students, faculty and staff. Since 1987 the Himmelfarb Library has had the honored tradition of promoting the artistic side of our patrons, and last year we were proud to have had 117 participants submit their work.

2015 Healthy Living Contest

We're looking for your students! During the month of February, Himmelfarb Library is hosting a Healthy Living@Himmelfarb Photo Contest. Any student in the School of Medicine and Health Sciences, Milken Institute School of Public Health, or School of Nursing is eligible to participate. To enter, students need to take a photo of themselves showing how they live a healthy life, and then submit it via Twitter or Instagram using the hashtag #healthyhimmelfarb. Full contest rules are available at the Himmelfarb Library Photo Contest.

2015 Himmelfarb Library Collection Update

Meet Gisela Butera, Reference/Instructional Librarian
The beginning of the new year brings change to the Himmelfarb Library collection, as new titles are added, seldom used titles are canceled and some journals change their titles.

**New Titles (Journals)**
- Bariatric Surgical Patient Care
- Comparative Biochemistry & Physiology – Part D: Genomics and Proteomics

**Want To Publish A Case Report?**
Immelfarb Library has a new guide on Where to Publish Case Reports which is designed to support novice writers in developing case studies for publication. The guide provides information on where to publish case studies, including information on BMJ Case Reports, as well as a list of additional journals which publish case studies.

**Healthy Living @ Himmelfarb - Spring**
Are your students still trying to find the right school-life balance? Struggling to fit healthy meals or exercise into their already packed schedules? Encourage them to sign up for one of the upcoming Healthy Living@Himmelfarb activities.

**Coming Soon: Faculty Survey of the Library’s Collections**
In an effort to continually shape a collection that fulfills the needs of students, staff and faculty from all three schools, all of Himmelfarb Library’s subscribed databases, journals and e-books are reviewed annually. Factors including usage, cost, and faculty publications are part of the analysis. To that end, we will be conducting a survey of fulltime faculty later in the spring semester so we can hear your thoughts.

Immelfarb Library continues this feature in our newsletter that lets us become better acquainted with our friends and colleagues at the George Washington University. In this issue we learn more about Gisela Butera, Reference/Instructional Librarian.

Immelfarb Library continues this feature in our newsletter that lets us become better acquainted with our friends and colleagues at the George Washington University. In this issue we learn more about Matthew Mintz, Associate Professor of Medicine.
Greetings and best wishes for 2015! Generally we look both forward and back at the beginning of a new year. For those of you who wish to review recent events and progress at the Himmelfarb Health Sciences Library, the Annual Report 2013-2014 is now available. The 2013-2014 year was very busy for the Library. There were 5,349,761 web page views, 13,135 reference questions answered, 1,470 classes/orientations with 18,116 attendees, and 533,373 in-person users. Collections expanded to 3,926 accessible electronic journals and 3,031 electronic textbooks. Colonial Printing stations were installed over the summer. These stations have proven reliability and can be used to print from mobile devices. The option of reserving selected group study rooms was added for students in fall 2014. During the winter break, study rooms on the third floor were sound proofed and new paint added to brighten dark corridors.

Looking forward, there will be additional renovations to the Himmelfarb Library facility. Mobile device charging stations will be installed on the third floor. More study rooms will be sound proofed over spring break and plans are shaping up to overhaul HVAC capabilities so that the building can remain at a comfortable temperature year round. Be sure to check the Library's home page for possible closings and alternate study space over summer 2015.

Fun activities are also underway for 2015. As part of our Healthy Living initiative, we are asking students and faculty to tell us how you maintain a healthy lifestyle by submitting photos that show how you exercise, eat nutritiously or relax. Simply post your photos to Instagram or Twitter and add the hashtag #healthyhimmelfarb to participate. Full contest details are at Photo Contest Guidelines. During April, Himmelfarb Library will once again host the annual Art Show featuring the creativity of students and faculty in the School of Medicine and Health Sciences, Milken Institute School of Public Health, and School of Nursing. The Library will begin accepting entries for the show on March 9, 2015. Distance education students can participate in the virtual portion of the art show by submitting entries to the Reference Desk. Everyone, artist or not, is invited to celebrate the work of our colleagues at the Art Show's opening reception on April 2, 2015 from 4 until 5:30 pm!

Stay current with all of Himmelfarb Library's activities through social media. Sign up to follow us on Instagram, Twitter and Facebook! Have a great spring semester.
The Himmelfarb Vision for 2020: Planning Our Next Five Years

In the fall of 2014 the Himmelfarb Health Sciences Library staff embarked on a strategic planning journey to map out the services, resources, and personnel needed to provide a state of the art health sciences library for the next five years. With the profession and technology changing rapidly, this was a challenging task and the entire staff is continuing to work collaboratively to develop objectives and goals.

An updated mission statement is now complete:

We support the information needs of the faculty, staff and students of SMHS, GWSPH, and SON by selecting, acquiring, and delivering information and by collaborating, educating, and building community.

The new mission reflects the ongoing traditional role of the academic library to provide the information resources needed by the community, and to educate students and staff in the best methods to find, assess, and organize these resources. It also looks forward to emerging roles that libraries and librarians are playing within the academic community to help produce and promote research, and to provide spaces and support for creativity and collaboration.

A few years back the importance of the library as a physical space was on the decline as print collections were replaced by electronic. But recently, libraries with spaces that allow people to work together, learn and use new technologies like 3-D printers, and build community through outreach programs like Healthy Living @ Himmelfarb, were recognized as valuable assets. At the same time, Himmelfarb needs to continue to build electronic collections and make services available beyond the Foggy Bottom campus as the schools it supports expand globally.

The strategic planning process will continue through the spring 2015 semester. A final plan should be available as part of the Library's 2014/2015 annual report.
The Artist in all of us...Himmelfarb's Art Show

Each year the Himmelfarb Library's first floor is transformed into an art gallery displaying the original works of our students, faculty and staff. Since 1987 the Himmelfarb Library has had the honored tradition of promoting the artistic side of our patrons, and last year we were proud to have had 117 participants submit their work.

There is an artist in all of us! We are encouraging all our patrons to share their talents and participate in this year's Himmelfarb Art Show. Please join us on April 2nd at our Art Show Reception when we launch the official first day of the art show with food and refreshments to honor our artists and celebrate their talents.

When will you begin accepting artwork?
Monday, March 2, 2015

Where do I go to drop off my artwork?
Himmelfarb Library Reference Desk
8:30am-8:00pm

What type of artwork do you accept?
We accept all types of artwork. (i.e. photography, ceramics, jewelry, paintings, sculptures, crafts...)

Who can submit artwork?
Faculty, students and staff in the School of Medicine and Health Sciences, Milken Institute School of Public Health and School of Nursing.

What is the date of the Opening Reception?
Thursday, April 2, 2015 4:00PM-6:00PM

Are there examples of past art submissions online?
Himmelfarb Library Annual Art Show Collections
2015 Healthy Living Contest

We're looking for your students! During the month of February, Himmelfarb Library is hosting a Healthy Living@Himmelfarb Photo Contest. 2015 Himmelfarb Library Collection Update

Want to Publish A Case Study?
Meet Gisela Butera, Reference/Instructional Librarian and Research Enthusiast

Himmelfarb Library continues this feature in our newsletter that lets us become better acquainted with our friends and colleagues at the George Washington University. In this issue we learn more about Gisela Butera, Reference/Instructional Librarian.

How long have you been at Himmelfarb Library/GW and how have your position and responsibilities evolved over the years?
I started working at GW in 2007. When I began working at Himmelfarb my primary role was instructional, and I mostly interacted with faculty and students by conducting library sessions or being embedded in their courses. Through the years my involvement in supporting research has grown and now I find myself more integrated into providing research support for both students and faculty.

What about your job do you most enjoy?
Research! Whether it is a research paper, dissertation, IRB study or systematic review I absolutely enjoy the process of searching the literature finding the gaps and discovering what has been written on the topic. Give me a challenging research topic and I dig right in and enjoy every step of the way!

What led you to a career as a medical librarian?
Long story…. (This story should really be told over drinks). My background is broadcast journalism and straight after college I worked at both CBS and ABC in NYC. I loved it and enjoyed the excitement and fast pace. When I married and moved to the Scranton, PA area, I focused on starting a family and enjoying time with my husband and two boys.

Returning to work I realized I needed to reinvent myself and explore other career opportunities. Library science was a good fit because it demands similar skills in searching for facts, research and delivering information. Through the years I have found many librarians with a journalism background…it is a good fit!

What is your most memorable moment at Himmelfarb?
I have many memorable moments and they always revolve around students taking the initiative to go beyond their academic experience here at GW and take the challenge to participate in a research study. I love it when a student I have helped contacts me to tell me the study they have worked on has been published. It doesn't get better than that!

What do you like to do in your time away from work?
Two places that are heaven-on-earth to me are NYC for the excitement and, to relax, Topsail Island, NC. I am a very proud Jersey girl who grew up outside of NYC and to me it has always been an exciting, magical place. I went there for Christmas this year and had a blast going to China Town, Little Italy and soaking up the electricity of the city. When I want to relax I go with my family to North Carolina’s Topsail Island. Topsail is a barrier island near Jacksonville, famous for its sea turtle rescue. We enjoy surfing, fishing, and just...
Faculty Profile - Matthew Mintz, Associate Professor of Medicine

Himmelfarb Library continues this feature in our newsletter that lets us become better acquainted with our friends and colleagues at the George Washington University. In this issue we learn more about Matthew Mintz, Associate Professor of Medicine.

Tell us a little bit about your current position or research/projects.
In September 2013, Dean Akman asked me to take charge of our curricular revision, in which I currently serve as Interim Assistant Dean for MD Program Curriculum. This past fall, our new Senior Associate Dean for MD Programs, Dr. Richard Simons, asked me to stay in the Dean's office to take leadership of the Pre-Clinical curriculum, and I await my appointment as Assistant Dean for Pre-Clinical Curriculum. There is an active search for an Assistant Dean for Clinical Curriculum who I will be working with, who will hopefully be named by the time this faculty profile is published. In addition to my roles in the Dean's office, I remain course director of our Practice of Medicine III (POM3) course and I also see patients with the Medical Faculty Associates in the Department of Medicine.

How did you become interested in your field?
After completing medical school here at GW, I stayed to do a residency in Primary Care/Internal Medicine. Close to my 3rd and final year of residency, I was asked to stay on as a Chief Medical Resident, which is a junior faculty appointment. At some point during my time as chief, I was bitten by the academic “bug.” I really liked the ability to see patients, teach and do research all at the same time. I also found that the academic environment allowed me to interact with some of the top professionals in their fields, and that the students and residents challenged me to be at my best. While my initial interests were clinical research, I was offered to take over the Primary Care Clerkship soon after joining the faculty full time. I jumped at the opportunity, and found that I really enjoyed working with students as a course director, as well as the challenges of running a successful medical school course. Since then, I have directed a variety of courses and clerkships, all of which prepared me well to lead our curricular revision.

What has been your biggest professional challenge?
The biggest professional challenge is trying to maintain balance while simultaneously not falling behind. One of the joys of academics is wearing multiple hats, but one of the difficulties is trying to juggle all of these responsibilities at the same time.

What has been your most memorable moment at GW?
I have been at GW since I was a medical student, so I fortunately have too many memorable GW moments to count. My oldest memorable moment was hearing then First Lady Hillary Clinton, who had been controversially appointed as “health care czar” by her husband, give one of her very first speeches on health care reform in Ross 101. My most
recent memorable moment was hearing Dr. Anthony Fauci speak to our first year medical students at the beginning of our first intersession. Dr. Fauci used his own personal story about his work in HIV to discuss both the history and current challenges of treating AIDS. He integrated basic science, clinical sciences, ethics, public policy and humanities into his talk; which felt (to me) like our entire first semester of the revised curriculum had led up to that very moment.

**What library resources or services have you found to be the most useful?**
The most useful library resources are the librarians. They are extremely knowledgeable in the right tools to use and how to use them to find information.

**Whom do you admire?**
There are so many people here at The George Washington University School of Medicine and Health Sciences that I admire, and I feel so privileged to call many of them my colleagues and friends. I admire our students who come to GW. They are so eager to learn and to help people, and have accomplished so much already, even before their arrival. If I have to pick one faculty that I admire, it would be Dr. Frank Slaby. As a student I remember Dr. Slaby as one of the students' favorite anatomy teachers. More recently, I have worked with Dr. Slaby in enhancing our curriculum. I am not only impressed by Dr. Slaby's commitment to excellence in education, but also amazed by his willingness to change the way he has taught and organized his courses, even after teaching here at GW for so many years.

**How do you spend your free time? (or What do you do to relax?)**
I am not sure if I ever get to relax, but any free time I have, I spend with my family. Both of my daughters (Allison, 13; Natalie, 10) are into musical theater, so there is a lot of time spent carpooling to rehearsals and seeing them perform.

**What advice would you give to a new faculty member just starting at GW?**
Take advantages of all the opportunities GW has to offer. Have a 5 year career plan in mind, but don't be surprised if it veers significantly in a different direction. Almost every job I have held here came as an opportunity and was not necessarily planned in advance.
Healthy Living @ Himmelfarb - Spring

Are your students still trying to find the right school-life balance? Struggling to fit healthy meals or exercise into their already packed schedules? Encourage them to participate in Healthy Living@Himmelfarb activities.

This semester’s activities have included:

Meditation
Every Thursday from 12:30-1:00 pm (Himmelfarb 305H)

Ice Skating at Washington Harbour
Ice Skating at Washington Harbour

Explore Art Therapy (hands-on session with Professor Tally Tripp)
Feb. 20th from 12-1:00 pm

Annual Basketball Tournament to benefit the Healing Clinic
Feb. 25th from 11-4:00 pm

John Albertson & The GW Gypsy Guitars Concert
March 24th from 11-1:00 pm

And more activities are being planned! Check the Healthy Living webpage for the latest and to register for designated activities.

Interested in collaborating with us? We are always looking for new faculty partners. If you have an idea for a Healthy Living@Himmelfarb activity, please contact Alexandra Gomes at gomesa@gwu.edu or (202) 994-1825. Focus areas include exercise, stress reduction, and healthy diets.
Coming Soon: Faculty Survey of the Library’s Collections

In an effort to continually shape a collection that fulfills the needs of students, staff, and faculty from all three schools, all of Himmelfarb Library’s subscribed databases, journals, and e-books are reviewed annually. Factors including usage, cost, and faculty publications are part of the analysis. To that end, we will be conducting a survey of full-time faculty later in the spring semester so we can hear your thoughts. We want to know how well the collection matches your research and teaching needs, how well library services (article links embedded in PubMed, for example) are working, and how you use mobile devices to access those resources, among other things. Your feedback is incredibly important to our efforts to offer the best collection possible, so please take a few minutes to complete the survey when it arrives later this spring. If you have any questions, please contact Steve Brown, Himmelfarb Library’s Serials Librarian at 202-994-9756 or swb105@gwu.edu.
